MOO ME GEN
OILS OF HOPE

**UNLOCKING
THE POWER OF**
Shea Butter

Extracted from organically grown nuts in the Shea Butter Belt in Otuke district, Northern Uganda, our shea butter is rich in character, complex in depth, colour and all natural. Shea butter contains vitamins A and E and the “skin” vitamin F, is pleasant smelling, quick absorbing with a creamy and consistent texture.

In using this butter, you will also benefit from the cinnamic acid esters, triterpene esters and oleic acid esters within the butter which have anti-inflammatory properties, stimulate skin tightening and skin elasticity by forming collagen, help protect the skin from the harmful effects of UV radiation and prevent the skin from drying out.

Guaranteeing the best product

The quality of shea butter not only depends on the quality of the shea nuts used, but also on the quality of the oil presses and process equipment. In producing Mo Me Gen shea butter at our own food grade facility, we use high-quality oil presses and chamber filter systems from Germany. All machine parts that come into contact with shea butter are made of food safe stainless steel which then guarantees a high shea butter quality.

Our oil extraction facility is in Otuke district and has the capacity to produce more than one metric tonne per day and we guarantee the best pure cold pressed Nilotica Shea Butter this side of the Nile!
